

CHRISTMAS TREE CARE TIPS

Thank you for your tree purchase. We want you to get the maximum use out of your tree. Please remember no two trees are the same so some will outlast others.

1. *Your tree has been given a fresh cut. A tree will begin to heal over within five (5) hours. If not putting up today, you may need a re-cut.*
2. *We suggest starting your tree with one cup of sugar dissolved in boiling water and let cool. Feed the tree warm water to open its pores. This practice has been used by our family for over fifty years.*
3. *Never let your tree stand go dry. If this happens, your tree will not be able to drink again.*
4. *Keep your tree in a cool room. Avoid locating near a fireplace or other sources of heat.*

MERRY CHRISTMAS

KARABIN FARMS

Open Daily April – December

Saturdays and Sundays January – March
